

Importing The Model Building Libraries

Date	29 October 2022
Team ID	PNT2022TMID45471
Project Name	AI-powered Nutrition Analyzer for Fitness Enthusiasts

Importing the necessary libraries

Importing Neccessary Libraries

```
import numpy as np #used for numerical analysis
import tensorflow #open source used for both ML and DL for computation
from tensorflow.keras.models import Sequential #it is a plain stack of layers
from tensorflow.keras import layers #A layer consists of a tensor-in tensor-out computation function
#Dense layer is the regular deeply connected neural network layer
from tensorflow.keras.layers import Dense, Flatten
#Flatten-used for flattening the input or change the dimension
from tensorflow.keras.layers import Conv2D, MaxPooling2D, Dropout #Convolutional layer
#MaxPooling2D-for downsampling the image
from keras.preprocessing.image import ImageDataGenerator
```
